

Concerned about Low Productivity ?

MCS can provide Manufacturing Execution Systems (MES) and Overall Equipment Effectiveness (OEE) solutions to give you accurate knowledge about your production lines and processes to efficiently direct your continuous improvement programs removing any ambiguity, or mis-leading conceptions.

MES and OEE systems can also predict equipment failures, pre-empting costly plant down time ensuring equipment repair and replacement can be done as part of a managed maintenance program.

As a certified Wonderware System Platform partner MCS can provide state of the art solutions on a recognised world renown platform which is scalable from a local factory installation, to multi-national plants, to worldwide multi- national installations.

MCS can provide a full turnkey system from updating the automation equipment with the required data blocks and network connectivity, to the high level MES and OEE systems.

MCS have provided solutions for companies such as:

- Suntory
- Federal Mogul
- Dairy
